DATE MAILED: 03/31/2003

Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

Allowable Subject Matter/Reasons for Allowance

5. The closest priors art, Saari discloses system and method to charge for network connection usage in which the billing unit computes the connection usage charges based connection time or amounts of data transferred during the connection (see column 5, lines 33-45). Koperda (US 6,230,203) discloses a system for providing flexible billing based on amount of network resources consumed which is the amount of data transmitted or the connect time of a network access device. Ginzboorg (US 6,240,091) discloses an implement access service in which the charging server collects the charging records generated by the user's terminal when the user's terminal access to the access servers operated by access service providers (see columns 5-15). Therefore, it is clear from the description of Saari's, Koperda's, and Ginzboorg's inventions that the prior arts do not considered the possibility of obtaining network flow data independent from accounting start-stop event data and correlating accounting start-stop event data and network flow data in to a subscriber specific call detail record unique to user by matching accounting start-stop event data associated with user with network flow data associated with user, as included in claims 1, 13, 15, 16, and 23, a network flow adapter in communication with network flow data in dependent from accounting start-stop event data and an integrating accounting adapter in communication with accounting adapter and network flow adapter, wherein integrating a accounting adapter correlates accounting start-stop event data and network flow data in to a subscriber specific call detail record unique to user by matching accounting
